Re: Mayer Holt #1-L, 28-18-26
Eddy County, N. M.

Gentlemen:

A reinspection was made on June 14, 1973, of the subject plugged and abandoned well, which revealed that the condition of the location had not changed since our last inspection and letter to you advising as to what must be done. Prior to approving the plugging report, the following must be accomplished:

1. Correct the marker which now reads 990 FWL and 650 FSL to 990 FWL and 1650 FSL.
2. Deadmen must be cut and covered.
3. All junk has to be buried or hauled off.
4. All pits have to be covered.
5. Tank pad has to be levelled.

Failure to comply and notify this office that all work has been completed within 30 days will result in this matter being referred to our attorney for further action.

Sincerely yours,

OIL CONSERVATION COMMISSION

Lelan A. Mermis
