Monahans, Texas

Re: Paul Terry et al  
Well #1, Unit F,  
Sec 15, T18S, R26E

Attention Mr. C. F. Dwyer

Gentlemen:

A recent field inspection of the location of the subject well reveals that the cellar is not filled, there is a swedge on the 10 3/4" inch casing and the well is leaking a small amount of gas. It is necessary that the cellar be filled, the gas shutoff and a standard marker showing the location of the well be set in the hole before the plugging of this well can be approved.

Please notify this office on form C-103 when this work has been completed.

Yours very truly,

OIL CONSERVATION COMMISSION

M. L. Armstrong,  
Supervisor, District No. 2

MLA/jn
