Attention: R. E. Nielsen

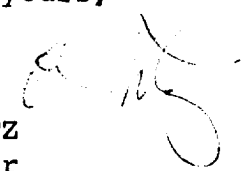

Gentlemen:

Reference removing your J. H. Everest Gas Com
No. 1 from the gas proration schedule.

The normal proration procedures require that a
well be physically disconnected from a purchaser
before removing it from the proration schedule.

If you or Transwestern will send us notice of
disconnection from your purchaser, we will remove
the well from the schedule.

Very truly yours,

ELVIS A. UTZ
Gas Engineer
