# THEORY OF THE EARTH

BY J. H. VAN DER KAM

PROFESSOR OF GEOLOGY, UNIVERSITY OF CALIFORNIA

This book is a treatise on the theory of the earth, and is intended for the use of students of geology. It is written in a clear and concise manner, and is suitable for both the beginner and the advanced student. The author has drawn upon his extensive experience in the field of geology, and has presented a comprehensive and up-to-date account of the theory of the earth.

The book is divided into two main parts. The first part deals with the general theory of the earth, and the second part deals with the special theory of the earth. The first part is divided into three chapters, and the second part is divided into four chapters.

The first chapter of the first part deals with the origin of the earth, and the second chapter deals with the development of the earth. The third chapter of the first part deals with the structure of the earth, and the fourth chapter deals with the history of the earth.

The first chapter of the second part deals with the theory of the earth, and the second chapter deals with the theory of the earth.

The third chapter of the second part deals with the theory of the earth, and the fourth chapter deals with the theory of the earth.
