PULLING REPORT

October 8, 1990 (Monday)	Patched road, cleaned out cellar.
October 10, 1990 (Wednesday)	Rigged up Black Warrior Wireline (BWW), tried to run gauge ring, would not go. BWW rigged down and moved off. Later, found out they used wrong gauge ring. BWW came back, ran gauge ring to 198' and stopped. Tried to load hole and wash bridge out. Not successful.
October 16, 1990 (Tuesday)	MIRU Dennis Tidwell Drilling cable tool rig. Shut down.
October 17, 1990 (Wednesday)	Ran casing swage, made it to a depth of 233'. TOH with swage, SDFN.
October 18, 1990 (Thursday)	TIH with bit and cleaned out to 1490'. SDFN.
October 19, 1990 (Friday)	Made it to 1700' with bit. TOH with bit. TIH with bailer. Cleaned out to 1675'. Rigged down cable tool rig.
October 20, 1990 (Saturday)	BWW rigged up and set CIBP @ 1640' and dumped 2 sxs. of cmt. on top. BWW rigged down and moved off.
October 23, 1990 (Tuesday)	Loaded casing in an attempt to pressure test casing. Casing would not load. Well has casing leak.
November 8, 1990 (Thursday)	T. R. Well Service roaded to location. Too wet to get in and rig up. Shut down.
November 9, 1990 (Friday)	Used backhoe to level road and location. MIRU T. R. Well Service. Picked up on csg. Casing was parted. Pulled 5 1/2 jts. of 4 1/2" csg. TIH with tbg. Could not get inside csg. TOH with tbg., tbg. plugged with mud. Called out Jim's Water Service. TIH with tbg., circulated, still could not get inside casing. TOH with tbg. TIH with pkr. and tbg. Circulated mud, stabbed into 4 1/2" csg. Ran pkr. to 297'. Shut down for weekend.
