## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill a 9600' Penn test gas well. Rotary tools will be used from surface to TD. Logs will be run. If indicated to be productive, casing will be run; indicated pays perforated, stimulated and evaluated. Casing program to be as follows:

Hole Size	Casing Size & Wt.	Approx. Depth	Comment
12 1/2-11"	9-5/8" 32.34-36#	1500	Circulated
7-7/8"	4-1/2" 9.54-11.6#	9600	600' above Abo if productive

APPROVAL IS SUBJECT TO STATE  
ENGINEERS AND IS NOT REQUIRED  
ON "APPLIED" CASING LIMIT TO  
DRILL FOR SURFACE WATER BASIN.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Hobbs, New Mexico

Gentlemen:

June 8, 1961, a survey was made to stake the location for your USA Malco Refineries "M" No. 1 at a point 2190 feet from the North and 1650 feet from the East lines of Sec. 4, Twp. 18 South, Range 27 East, N.M.P.M., Eddy County, New Mexico.

A flag was set at the corner marker common to sections 33, 34, 3 and 4, and the transit was set up over the quarter corner marker common to sections 3 and 4 and the survey was started from that point; thence  $N0^{\circ}38'W$  along the section line 330.0 feet, thence  $N89^{\circ}32'W$  1650.0 feet to the location. To check we then chained  $S89^{\circ}32'E$  1650.0 feet and  $S00^{\circ}38'E$  330.0 feet, missing the quarter corner marker 0.4 feet, which is within the allowable limits of this survey.

I hereby certify that the foregoing survey was made in the field under my supervision and that the same is true and correct to the best of my knowledge and belief.

Respectfully submitted,

  
John W. West
