Title President.

Address Artesia, New Mexico.

Approval to deepen is given with the following understanding.

1. The 6 5/8" casing may be mudded to secure a water shut off. After the casing is landed and mudded a water shut off test must be made and witnessed by an engineer from the Roswell office of the U. S. Geological Survey.
2. If the conditions in this well are found to be similar to the conditions existing in the R. D. Compton-Mann #4 well in section 4, T. 18 S., R. 27 E., the oil horizon corresponding to 1660 to 1900 feet in the Mann well must be tested and approval obtained from this office before drilling ahead.
