DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On October 18, 1961 we fracked well. Well was placed on production October 20, 1961 - pumped 50 barrels of water a day and for about 30 days and started to show oil. After 45 days, well was making 21 barrels of oil and 15 barrels of water.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
