DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to dig with rotary 11" hole to a depth of approximately 1080' or 50' into the line, set 20# 7" seamless casing, cement with 70 sacks, preceded by heavy mud to the surface. After rotary has set pipe, we propose to move in cable tools and drill to approximately 1200' to test the sand pay there.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
