Humble Oil & Refining Company  
P. O. Box 2437  
Hobbs, New Mexico

Returned un-approved are all copies of your subsequent reports of cementing the  $\frac{1}{2}$ -inch production strings in wells No. 3 and 4 Abo-Chalk Bluff Draw Unit.

The Notices to Drill, which were submitted by Mr. C. D. East of Midland, Texas, and approved by this office, provided that cement behind the production strings was to be circulated to approximately 600 feet above the top of the uppermost pay. There is shallow production in the area and our records show that the offset directly north of your well No. 4 is producing from an interval from 2,017 to 2,114 feet.

Please advise this office in sufficient time so that a representative of this office may witness the re-cementing operations.

Very truly yours,

(Orig. Sgd.) JAMES A. KNAUF

James A. Knauf  
District Engineer
