The above well was shut in on November 20, 1971. The well was shut in because it was uneconomical to produce. This well is being held for secondary recovery and as a pressure observation well. The status of well is subject to change as the producing characteristics of the unitized area changes. No estimated date of change. This well is a part of the Empire Abo Pressure Maintenance Project per OCC Order No. R4548, R4549 & as amended.

Request an extension of present status.
