The elevation of the derrick floor above sea level is _____ ft. To be reported later.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well with rotary tools to an approximate depth of 7,000' to test the sand and top of Wolfcamp. Casing program will be as follows:

Size of Hole	Size of Casing	Depth	Remarks
17-1/2"	13-3/8"	500	200% of theoretical amount to circulate to surface.
12-1/4"	9-5/8"	2000	150% to top of Queen from Caliper survey containing 8% gel, 1/2 tbf plug per sack + 100 sacks cement.
8-3/4"	5-1/2"	7000	300 sacks cement cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
