McKee - McCreder

Well No. **4** is located **330** ft. from **S** line and **330** ft. from **E** line of sec. **12**

34, **35**, **36** (Sec. and Sec. No.) **18 E** **27 E** (Range) (Meridian)
Artesia (Field) **McCreder** (County or Subdivision) **New Mexico** (State or Territory)

The elevation of the derrick floor above sea level is **3613** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Wish to drill this well to about 1650 feet and test this zone. If non-productive. Wish to drill well to about 2000 feet. Possible pay sections are about 1600 feet and 1985 feet.

Casing program:

Land 250' 10 3/4" 40 lb. pipe and pull. Run about 425' 5 5/8" pipe and cement with 20 sacks. Run about 1600' 7" 20 lb. pipe and set with packer shoe if this zone is productive. If not run about 1900' of 7" 20 lb. pipe with packer shoe for production string.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
