Figure 1: Schematic representation of the experimental design. The diagram shows a sequence of events: 'Stimulus presentation' (a box with a question mark), 'Response' (a box with a question mark), 'Feedback' (a box with a question mark), and 'Inter-trial interval' (a box with a question mark). The sequence is repeated for multiple trials, with a 'Start' box at the beginning and an 'End' box at the end.

Figure 1. The effect of the concentration of the *Salmonella* suspension on the detection of *Salmonella* in the fecal sample. The detection of *Salmonella* was performed by the PCR method. The results were expressed as the percentage of positive samples. The data were analyzed by the chi-square test. The results are shown in the table.

$\frac{1}{2} \log \frac{1}{2}$
