Locate increa will b Rule		HAR BUNK
No well will be assigned an allowable greater than the amount of oil produced on the official test. During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is loc sited by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased atlowables when authorized by the Commission. Gas volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F. Specific gravity base will be 0.00. Report cosing pressure in lieu of tubing pressure for any well producing through casing. Multi-report dual and one copy of this report to the district office of the New Vesice Oil Conservation Commission in accordance with Multi-Aqui and appropriate pool take. C. A.
