The above well was shut in on July 1, 1972. Well was shut in because it was uneconomical to produce. This well is being held for secondary recovery and/or pressure observation well. The well is currently being used as a pressure observation well. The status of this well is subject to change as the producing characteristics of the unitized area changes. No estimated date of change. This well is a part of the Empire Abo Pressure Maintenance Project per OCC Order No's R4548, R4549 & as amended. Request on extension of present status.
