January 27, 1958

Federal "B" Lease  
Well No. 1-22 is located 660 ft. from 18 line and 1930 ft. from W line of sec. 22  
SE 1/4 34 1/4 Sec. 22 18 27E N. 31. 30. W.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Wildest Eddy New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3425 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I plan to drill a 2500' San Andres wildest, using cable tools all the way.

I propose to set 300' of 10 3/4" surface pipe with 50 sacks.

We will probably mud 8 5/8" at approximately 1500' for a water shut off.

If commercial production is found in the Grayburg or San Andres section, I plan to run 7" for an oil string, cementing with 100 sacks.

All casing will be run and cemented using methods approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
