**Federal Nearburg**  
Well No. **1-32** is located **330** ft. from **(N)** line and **660** ft. from **(E)** line of sec. **32**  
**NE/4NE/4** **32** **188** **27E** **N.M.P.M.**  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
**E. Dayton Undesignated** **Eddy** **New Mexico**  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **3351** ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I plan to drill a 1650' Grayburg sand test with combination tools.

I propose to set approximately 120' of 10 3/4" with 25 sacks.

I plan to mud approximately 1350' of 7" for a water shut off and drill ahead with cable tools.

I expect to pull the 7" and cement 4 1/2" on bottom at approximately 1650'. Subject to the approval of the State Engineer's Office, we plan to two stage the cement job using a DV tool and sufficient cement to circulate. All casing will be run and cemented so as to comply with rules of the U. S. Geological Survey and the State Engineer's Office.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
