Well No. #5 is located 990 ft. from <sup>(N)</sup> line and 2310 ft. from <sup>(E)</sup> line of sec. 8  
*formerly well 5-Compton*  
SW/4 NE Section 8 18-S, 27-E N.M.P.M.,  
(4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
EMPIRE EDDY NEW MEXICO  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging job assignment points, and all other important proposed work)

This is an old well drilled to a depth of 1170' in 1954. We plan to drill this well down to approximately 2,000 feet and test the San Andreas formation.

At the present time there is 1040 feet of new 7" O.D. casing in the hole, cemented. If we complete well in the San Andreas, we will run 4-1/2" casing to bottom and run enough cement to tie the two strings together.

Work to be done by Apache Drilling Company, Artesia, New Mexico.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
