Well drilled in 1926'. Has gone to water and is not commercial. 10" set at 328'. 8-5/8" set at 723'. Not cemented. No salt logged but there just could be some at about 400 to 500'. Pay at 2398' to 2410'. Total depth 2432'. Propose to set 10 sack cement plug at about 2300' through tubing and another at about 750'. Think we can pull all of the 8-5/8" and perhaps 60 or 80' of the 10-3/4". Water sand from 270'-274'. After pulling 8-5/8" will set 10 sack cement plug below water (about 300') and set marker in cement on top. Will have hole full of mud before setting the cement plugs.
