17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

6-8-70, 6-9-70

Pulled rods & Tubing. Dumped 125 sks. sand to fill hole to 2327'.

6-10-70

Mixed and dumped 1 sack cal-seal, with dump bailer at 2327'. Ran Baker 7' full bore packer set at 2083'. Cemented with 250 gallons Temblok 60 followed by 25 sks cal-seal mixed with 25 sks. Incor cement followed by 50 sks. Incor Class "C" with 10# sand per sack and 5% salt. Shut in overnight.

6-11-70 Pulled tubing & pkr., started drilling cement at 2190'. **6-12-70**

Drilled through cement at 2315'. Drilled Cal-seal plug at 2323'. Circulated sand to T.D. 2636'. Ran tubing with mud anchor at 2525'-48'.

6-13-70

Ran 99 5/8" rods and pump and started well pumping.

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
