DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Filled hole with mud laden fluid to 1935 after pulling four joints of 6-5/8" pipe. Filled in with loose rock for the next 400 feet and put in 5 sacks of cement, then pulled the balance of the 6-5/8" and filled with mud as we were pulling. There was no 8 1/2" pipe in the well as shown on the Notice of Intention to Abandon well. We had to shot the 10" off at 125' leaving 60' in the hole. We filled the hole with mud up to 130' and put in five feet of loose rock and set three sacks of cement to protect the water, then filled the hole to the surface and set regulation marker.
