

OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below.

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	X	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL

THEORY OF THE EARTH AND ITS HISTORY

CHAPTER I

THE EARTH AND ITS HISTORY

The Earth is a sphere, and its surface is covered by water. The land is divided into continents and islands. The continents are Asia, Europe, Africa, North America, and South America. The islands are scattered throughout the oceans. The Earth is divided into seven climates: torrid, temperate, and frigid in each hemisphere. The torrid climate is the hottest, the temperate is moderate, and the frigid is the coldest. The Earth is also divided into five zones: the torrid zone, the temperate zone, and the frigid zone in each hemisphere. The torrid zone is the hottest, the temperate is moderate, and the frigid is the coldest.
