12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

A notice to deepen this well was filed and the work started. However, the CSG in the well was found to be severely corroded from 880' to surface making the option of drilling a replacement well more economical. Therefore it is now proposed to P & A this old wellbore and drill a replacement 90' SW of the old well. Proposed plugs are as follows as per instructions of the Artesia NMOC office.

Plug (1) 25 sx @ 1980' (perfs: 2032' - 60') tag
Plug (2) 25 sx @ 1540' (top of queen)
Plug (3) 25 sx @ 1100' (bottom of salt)
plug (4) 25 sx @ 600' (top of salt & 8 5/8" shoe plug) perf, spot plug and tag
Plug (5) 10 sx @ surf plug

This notice supersedes the previous filing to deepen this wellbore.

Wellbore sketch attached.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
