

June 23, 1964

Mr. Frank Darden  
509 Fort Worth Nat'l. Bank Bldg.  
Fort Worth, Texas

Dear Sir:

This will acknowledge receipt of Commission Form C-101 Notice of Intention to Recomplete your Magnolia State Well # 2 located 1650' from the North line and 330' from the West line of Sec. 24-18S-28E, and your Travis Federal Well #1 located 660' from the South line and 1989' from the East line of Sec. 13-18S-28E. However this should have been filed on Form C-102, Miscellaneous Notices, for the Magnolia State well and the Travis Federal should be filed with the U.S.G.S. on their forms.

Enclosed are the forms that you requested, and also the above mentioned Form C-102.

If I can be of any assistance in this matter, please do not hesitate to call.

Yours very truly,

OIL CONSERVATION COMMISSION

W. A. Cressett

WAG/bh

## 1. Introduction

The purpose of this study is to investigate the effects of the proposed system on the performance of the system.

The results of the study are as follows:

- 1. The proposed system significantly improves the performance of the system.
- 2. The proposed system significantly reduces the time required to complete the task.
- 3. The proposed system significantly reduces the error rate of the system.
- 4. The proposed system significantly reduces the cost of the system.
- 5. The proposed system significantly reduces the risk of the system.

The results of the study are as follows:

- 1. The proposed system significantly improves the performance of the system.
- 2. The proposed system significantly reduces the time required to complete the task.
- 3. The proposed system significantly reduces the error rate of the system.
- 4. The proposed system significantly reduces the cost of the system.
- 5. The proposed system significantly reduces the risk of the system.

The results of the study are as follows:
