PULL OR ALTER CASING ☐	OTHER ☐	CASING TEST AND CEMENT JOB ☐	
OTHER ☐		OTHER ☐	

17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

After completion as shown on Form C-105, dated 1-12-79, it was found that there was a hole in the 8 5/8" casing at 42'. After consultation with Mike Williams, we squeezed the hole with 100 sacks of cement containing 3% CaCl₂. We then dug out the cement from around the top of the 8 5/8" casing and filled up the hole around the casing with 4 yards of concrete mix. We drilled out the cement plug and tested the casing to 400' with 170# pressure. Meter on water line indicated no leak. We then drilled out the plug at 400 ft. and tested the casing and cavern to 170#. Again the water meter indicated no leak. The 2 7/8" tubing was hung in the open hole and the well head reinstalled for service.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
