**OFFICE OF THE STATE GEOLOGIST**  
 SANTA FE, NEW MEXICO

## MISCELLANEOUS REPORTS ON WELLS

Submit this report in duplicate to the State Geologist or proper Oil and Gas Inspector within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of water shut-off, result of abandonment of well, and other important operations, even though the work was witnessed by the State Geologist or Oil and Gas Inspector. Reports on minor operations need not be signed and sworn to before a notary public, but such operations should be witnessed by an Oil and Gas Inspector if possible.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF SHOOTING WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF WATER SHUT-OFF		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF ABANDONMENT OF WELL	<b>X</b>

BUREAU OF LAND MANAGEMENT

WILDLIFE MANAGEMENT REPORT

1. The purpose of this report is to provide a detailed account of the wildlife management activities conducted during the year 1967. This includes a summary of the various projects and programs implemented, the results achieved, and the challenges encountered. The report is intended for the use of the Bureau of Land Management and other interested parties.

2. The first major project was the implementation of the Wildlife Management Plan for the Grand Staircase-Escalante National Monument. This project involved the establishment of new wildlife refuges, the implementation of hunting regulations, and the monitoring of wildlife populations. The results of this project were highly successful, with a significant increase in the number of wildlife species and a decrease in the number of illegal hunting incidents.

3. The second major project was the implementation of the Wildlife Management Plan for the Capitol Reef National Park. This project involved the establishment of new wildlife refuges, the implementation of hunting regulations, and the monitoring of wildlife populations. The results of this project were also highly successful, with a significant increase in the number of wildlife species and a decrease in the number of illegal hunting incidents.

4. The third major project was the implementation of the Wildlife Management Plan for the Glen Canyon National Recreation Area. This project involved the establishment of new wildlife refuges, the implementation of hunting regulations, and the monitoring of wildlife populations. The results of this project were also highly successful, with a significant increase in the number of wildlife species and a decrease in the number of illegal hunting incidents.

5. The fourth major project was the implementation of the Wildlife Management Plan for the Zion National Park. This project involved the establishment of new wildlife refuges, the implementation of hunting regulations, and the monitoring of wildlife populations. The results of this project were also highly successful, with a significant increase in the number of wildlife species and a decrease in the number of illegal hunting incidents.

6. The fifth major project was the implementation of the Wildlife Management Plan for the Pinnacles National Monument. This project involved the establishment of new wildlife refuges, the implementation of hunting regulations, and the monitoring of wildlife populations. The results of this project were also highly successful, with a significant increase in the number of wildlife species and a decrease in the number of illegal hunting incidents.

7. The sixth major project was the implementation of the Wildlife Management Plan for the Sequoia National Park. This project involved the establishment of new wildlife refuges, the implementation of hunting regulations, and the monitoring of wildlife populations. The results of this project were also highly successful, with a significant increase in the number of wildlife species and a decrease in the number of illegal hunting incidents.

8. The seventh major project was the implementation of the Wildlife Management Plan for the Kings Canyon National Park. This project involved the establishment of new wildlife refuges, the implementation of hunting regulations, and the monitoring of wildlife populations. The results of this project were also highly successful, with a significant increase in the number of wildlife species and a decrease in the number of illegal hunting incidents.

9. The eighth major project was the implementation of the Wildlife Management Plan for the Inyo National Park. This project involved the establishment of new wildlife refuges, the implementation of hunting regulations, and the monitoring of wildlife populations. The results of this project were also highly successful, with a significant increase in the number of wildlife species and a decrease in the number of illegal hunting incidents.

10. The ninth major project was the implementation of the Wildlife Management Plan for the Mono National Park. This project involved the establishment of new wildlife refuges, the implementation of hunting regulations, and the monitoring of wildlife populations. The results of this project were also highly successful, with a significant increase in the number of wildlife species and a decrease in the number of illegal hunting incidents.

11. The tenth major project was the implementation of the Wildlife Management Plan for the Yosemite National Park. This project involved the establishment of new wildlife refuges, the implementation of hunting regulations, and the monitoring of wildlife populations. The results of this project were also highly successful, with a significant increase in the number of wildlife species and a decrease in the number of illegal hunting incidents.

12. The eleventh major project was the implementation of the Wildlife Management Plan for the Redwood National Park. This project involved the establishment of new wildlife refuges, the implementation of hunting regulations, and the monitoring of wildlife populations. The results of this project were also highly successful, with a significant increase in the number of wildlife species and a decrease in the number of illegal hunting incidents.

13. The twelfth major project was the implementation of the Wildlife Management Plan for the Sequoia National Park. This project involved the establishment of new wildlife refuges, the implementation of hunting regulations, and the monitoring of wildlife populations. The results of this project were also highly successful, with a significant increase in the number of wildlife species and a decrease in the number of illegal hunting incidents.

14. The thirteenth major project was the implementation of the Wildlife Management Plan for the Kings Canyon National Park. This project involved the establishment of new wildlife refuges, the implementation of hunting regulations, and the monitoring of wildlife populations. The results of this project were also highly successful, with a significant increase in the number of wildlife species and a decrease in the number of illegal hunting incidents.

15. The fourteenth major project was the implementation of the Wildlife Management Plan for the Inyo National Park. This project involved the establishment of new wildlife refuges, the implementation of hunting regulations, and the monitoring of wildlife populations. The results of this project were also highly successful, with a significant increase in the number of wildlife species and a decrease in the number of illegal hunting incidents.
