Figure 1 is a line graph illustrating the percentage of the total sample for various age groups across different years. The y-axis represents the percentage of the total sample, ranging from 0 to 100. The x-axis represents the years, with labels for 1980, 1990, 2000, 2010, and 2020. The age groups are listed on the right side of the graph: 0-14, 15-24, 25-34, 35-44, 45-54, 55-64, 65-74, and 75+.

The graph shows a general trend of decreasing percentages for younger age groups and increasing percentages for older age groups over time. For example, the 0-14 age group starts at approximately 15% in 1980 and decreases to about 10% by 2020. Conversely, the 75+ age group starts at approximately 5% in 1980 and increases to about 15% by 2020.

Figure 1 is a line graph showing the percentage of total sample for each age group across different years. The y-axis represents the percentage of total sample, ranging from 0 to 100. The x-axis represents the years, with labels for 1980, 1990, 2000, 2010, and 2020. The age groups are represented by different symbols: 0-14 (circle), 15-24 (square), 25-34 (triangle), 35-44 (diamond), 45-54 (plus), 55-64 (asterisk), 65-74 (x), and 75+ (hash). The graph shows a general trend of decreasing percentages for younger age groups and increasing percentages for older age groups over time.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.
