April 14, 1958

Well No. **Dunn 3** is located **7** ft. from **1000** ft. from **1980** ft. from **12** line and **12** line of sec. **12**

SE 34 Sec. 12 18 28 N

(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Artesia **Sady** **New Mexico**

(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **3632** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The above well was drilled to total depth 2683'. 7" casing is cemented at 2322' with 50 sax. We desire to deepen the above well to 2860'. Run a 4 1/2" liner to be set at total depth and the top of liner at 2100' and cement with sufficient volume (est. 75 sax) to come back to top of liner. We then intend to run Gamma-Ray Neutron Survey, perforate and frac.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
