

DUPLICATE

NEW MEXICO OIL CONSERVATION COMMISSION
Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public. Reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF	<input checked="" type="checkbox"/>	REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL			

Artesia, N. Mex.

Dec. 17, 1939

Place

Date

OIL CONSERVATION COMMISSION
Santa Fe, New Mexico.

Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the
R. W. Fair State **Well No. 2 Watson & Smith**
Company or Operator Lease
SE-10-62 of Sec. **4**, T. **18 S**, R. **29 E**, N. M. P. M.,
Loce Hills Field, **May** County

The dates of this work were as follows: **Dec. 17, 1939**
Notice of intention to do the work was (~~was~~) submitted on Form C-102 on **12/14/39** 19
and approval of the proposed plan was (was not) obtained. (Cross out incorrect words.)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Set 450' of 8 1/2" 20# casing and cemented with 50 sacks cement, using Halliburton equipment.

Plug was drilled on Dec. 17, 1939 and we found that shut-off was complete and satisfactory.

Witnessed by **W. A. Hammond** **Allen, Fair & Pope** **Supt.**
Name Company Title

Subscribed and sworn to before me this
20 day of **Dec.**, **39**

[Signature]
Notary Public

I hereby swear or affirm that the information given above is true and correct.

Name **Frank P. Callum**

Position **Book-keeper**

Representing **R. W. Fair**
Company or Operator

My Commission expires **2/28/40**

Address **Box 516, Artesia, N. Mex.**

Name
OIL & GAS INSPECTOR
Title

1. The first part of the paper is devoted to a discussion of the general principles of the theory of the structure of the atom. It is shown that the structure of the atom is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

2. In the second part of the paper, the author discusses the problem of the structure of the nucleus. It is shown that the structure of the nucleus is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

3. In the third part of the paper, the author discusses the problem of the structure of the molecule. It is shown that the structure of the molecule is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

4. In the fourth part of the paper, the author discusses the problem of the structure of the crystal. It is shown that the structure of the crystal is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

5. In the fifth part of the paper, the author discusses the problem of the structure of the liquid. It is shown that the structure of the liquid is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

6. In the sixth part of the paper, the author discusses the problem of the structure of the gas. It is shown that the structure of the gas is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

7. In the seventh part of the paper, the author discusses the problem of the structure of the plasma. It is shown that the structure of the plasma is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

8. In the eighth part of the paper, the author discusses the problem of the structure of the solid. It is shown that the structure of the solid is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

9. In the ninth part of the paper, the author discusses the problem of the structure of the liquid crystal. It is shown that the structure of the liquid crystal is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

10. In the tenth part of the paper, the author discusses the problem of the structure of the polymer. It is shown that the structure of the polymer is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

11. In the eleventh part of the paper, the author discusses the problem of the structure of the crystalloid. It is shown that the structure of the crystalloid is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

12. In the twelfth part of the paper, the author discusses the problem of the structure of the amorphous solid. It is shown that the structure of the amorphous solid is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.

13. In the thirteenth part of the paper, the author discusses the problem of the structure of the liquid crystal. It is shown that the structure of the liquid crystal is determined by the laws of quantum mechanics, which are based on the principle of the uncertainty of the position and momentum of the particles.
