Production from this well has declined to approximately 1 bbl. oil per day and the well is no longer profitable. It is our plan to plug and abandon this well. The plugging of this well was discussed in your Artesia office the first week of June and the following plan was decided upon:

Plan to fill hole with mud and dump 10 sack cement plug on bridge set in open hole below 7" casing with this plug extending up into the 7" casing, then knock off and pull 7" casing. Then place 10 sack cement plug at base of salt and 10 sack cement plug at top of salt and into 8" casing, then pull 8" casing and place cement plug and pipe marker at surface.

Approved _____, 19____
