Well No. **7** is located **660** ft. from **N** line and **1980** ft. from **E** line of sec. **6**
37 1/2 Sec. **6**, **18** **29** **N.E.P.M.**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Leve Hills **Eddy** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a well with cable tools to a depth of 2700 feet unless oil and gas is encountered in commercial quantities at a lesser depth. All casing set will be cemented by approved methods of the U.S.G.S. and 8 1/8 inch casing will be set at top salt and 7 inch oil string will be set at 2600 feet. The surface casing will be cemented with 90 sacks cement, oil string will be cemented with 100 sacks of cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
