17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Well is currently a water injection well in our Far West Loco Hills Unit. A study of field conditions and spacing has indicated to us that this well would prove more beneficial to the project as a producing well. Therefore we propose to the plastic coated tubing and packer from the well, run 2" production tubing with rods and pump, set pumping unit and connect to the production system and commence production.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
