1. Pulled & laid down rods and tubing.

- 2. Ran 7" Guiberson injection packer on 74 joints of 2 3/8" internally plastic coated tubing.
- 3. Loaded casing annulus with chemical water.
- 4. Set injection packer @ 2293'.
- 5. Installed a the needle valve on casing. Valve is to be left open to monitor any leak which might develop downhole.
- 6. Commenced water injection 10-16-75 in accordance with Administrative Order WFX No. 425. 429

0H-2298-2446

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
