(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

March 19, 1964

Well No. 6 is located 990 ft. from SK line and 330 ft. from E line of sec. 10
SE 1/4 of SE 1/4 18S 29E NMPM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Loco Hills Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It has become necessary to change our plans for recompletion of this well as we were unable to get a suitable rotary rig for this work. A cable tool rig will be moved in immediately. Now that we will be using cable tools we plan to reconnect the 8" surface casing with good 8" casing where pulled from a collar at a depth of 219 feet. This will protect the salt section and it will not be necessary to two stage cement the oil string and circulate cement to the surface as originally planned.
