The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

O. C. C.
ARTESIA, OFFICE

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well has been used for gas injection for several years. The gas maintenance program has been abandoned. This well has been temporarily abandoned until such time as it will be needed as a producing or injection well under the proposed plan of water flood. The casing is in good condition and there have been no cement or mud plugs run. There are three joints of tubing below the casing head and the well is closed in.

ILLEGIBLE
