The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

In accordance with verbal approval secured from Mr. James Knauf April 21, 1964 we have entered this temporarily abandoned well and cleaned it out to a total depth of 2615'. A Schlumberger section gauge was run and the well is now shut in pending admittance to the West Loco Hills Unit.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
