**DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED**

S

This well was deepened from old total depth of 2527' to a new total depth of 2717' in lime. Although some sand was encountered in drilling deeper, we do not feel that it carried any oil. The well was making an average of 3½ barrels per day before deepening and it is now making an average of 7½ barrels per day. We believe the cleaning out caused the well to produce more oil rather than additional pay being drilled.
