Travis
Well No. **10** is located **660** ft. from **[S]** line and **660** ft. from **[E]** line of sec. **18**
C SE SE Sec 18 **168** **168** **N.M.P.M.**
(4 Sec. and Sec. No.) (Twp.) (Range) (County)
Loce Hills **Edley** **New Mexico**
(Field) (County or Sub-County) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands, show sizes, weights, and lengths of proposed casings; indicate casing joints, cementing points, and all other important proposed work)

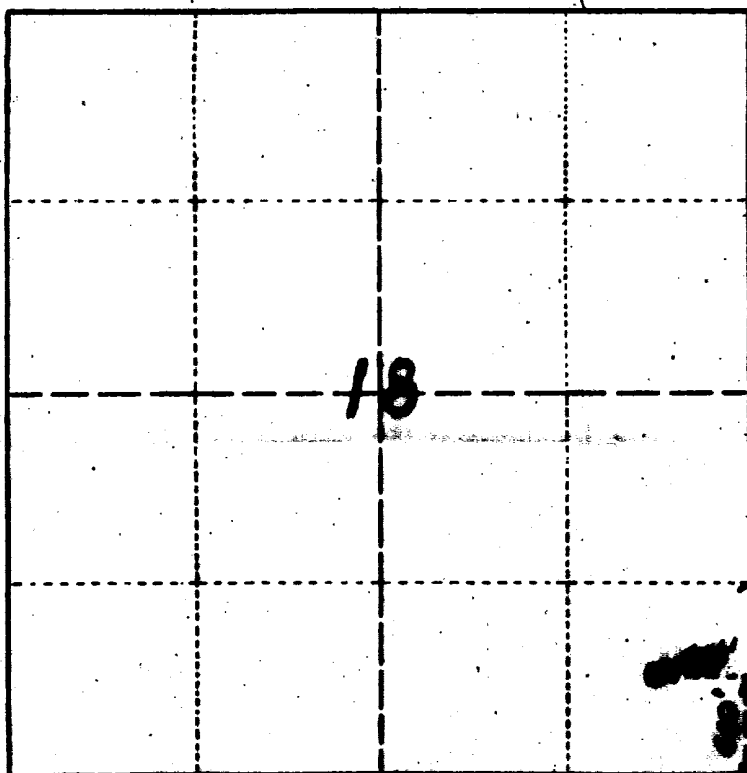

We propose to drill a well with cable tools to a depth of 3000 feet unless oil and gas is encountered in commercial quantities at a lesser depth. All casing will be cemented by approved methods of the U.S.G.S. and 8 5/8 inch casing will be set at top of salt and cemented with 50 sacks cement if surface water is encountered. If no surface water is encountered will just set pipe. If oil is encountered we will immediately intend to set 5 1/2 inch pipe at around 2700 feet and cement.
