DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Expect to drill to approximately 3000 feet, unless production at a lesser depth. Will drill with company cable tools of Denton Oil Company and will commence operations on or before 10/18/56. Will run approximately 350' of 8-5/8" used 28# casing with 50 sacks, if water is encountered. If no water, will circulate mud behind oil casing to surface and pull 8-5/8" casing. Will run approximately 3000' of 5-1/2" new or second hand 14# casing and cement with 100 sacks.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
