PROP # 24456

POOL # 61020

W. H. G. OK

Injection is to be through the one water injection well authorized for each project, each of which shall be equipped with cement-lined tubing set in a packer at approximately 1950 feet. The casing-tubing annulus of each well shall be loaded with an inert fluid and equipped with a pressure gauge to facilitate detection of leakage of the casing, tubing, or packer.
