Well No. 4 is located 2310 ft. from N line and 990 ft. from E line of sec. 33NE 1/4 33 18 29 N.M.P.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)Turkey Track Eddy New Mexico  
(Field) (County or Subdivision) (State or Territory)The elevation of the derrick floor above sea level is 3430 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Wish to drill a well on the above described location as follows:

Drill to salt with 10" hole and cement 8 5/8" pipe with 25 sacks, this should be at approximately 335 feet. We then intend to drill to a depth sufficient to explore the Red Sand. If Red Sand is unproductive, we will explore to a depth not to exceed 3,000 feet.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
