**February 8**, 1957

**McKee-Wilson**  
Well No. **1** is located **2310** ft. from **[N]** line and **1940** ft. from **[E]** line of sec. **34**

**SE 1/4 NW 1/4 34** **18** **29** **N.E.P.**  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

**Turkey Track** **Eddy** **New Mexico**  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **3417** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Wish to drill a well on the above described location as follows:

Drill to salt with 10" hole and cement 8 5/8" pipe with 25 sacks, this should be at approximately 335 feet. We then intend to drill to a depth sufficient to explore the Red Sand. If Red Sand unproductive, we will explore to the depth not to exceed 3000 feet.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
