The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding, cementing points, and all other important proposed work)

Propose to drill well to an approximate depth of 2800 feet, to test the Loco Mills Sand, with rotary equipment.

Expect to set approximately 400 feet of new 20" 7" casing, on top of salt and cement with 50 sacks of cement. Also plan to set approximately 2800 feet of 4 1/2" casing, as production string, and cement with 100 sacks of cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
