DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Intend to drill with rotary tool to test the Grayburg Formation expected to be penetrated at approximately 2500 feet. Will set 7" OD 17# casing at approximately 400" and cement same with 75 sax cement. If completion is attempted, will run $4\frac{1}{2}$ " OD 9.5# new casing to approximately total depth and cement same with 100 sax cement. Intend to abide by the fules and regulations of the department.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

INSTRUCTIONS FOR COMPLETION OF FORM C-128

- 1. Operator shall furnish and certify to the information called for in Section A.
- 2. Operator shall outline the dedicated acreage for *both* oil and gas wells on the plat in Section B.
- 3. A registered professional engineer or land surveyor registered in the State of New Mexico or approved by the Commission shall show on the plat the location of the well and certify this information in the space provided.
- 4. All distances shown on the plat must be from the outer boundaries of the Section.
- 5. If additional space is needed for listing owners and their respective interests as required in question 3 of Section A, please use space below.
