17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

On October 22, 1974, the open hole interval - 3497' - 3531' was sand water fraced with 40,000 gal. This treatment did not stimulate production. On or about December 14, 1974, in accordance with telephone conversation with Mr. Knauf, we plan to plug and abandon this well as follows:

- Run 2" tubing and circulate hole with heavy mud and spot a 25 sack, 150' plug. 3530 TD - 3380' and 3000' - 2850' at top of 5 1/2" liner.
- Run free point and cut 7" casing and spot 35 sack, 150' plug.
- Spot 35 sack, 150' plug in and out base of 8-5/8" casing at 517'.
- Spot 25 sack, plug and marker at surface.
