Well No. **1-C** is located **1980** ft. from **[N]** line and **660** ft. from **[E]** line of sec. **5**
SE-NE Sec. 5 **18 S** **30 E** (Meridian)
(1/4 Sec. and Sec. No.) (Twp.) (Range) (State or Territory)
Loco Hills **Eddy** **3579**
(Field) (County or Subdivision) **U. S. GEOLOGICAL SURVEY**
ARTESIA, NEW MEXICO

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Plan to drill to and set approx. 500' of 8 5/8" O.D. 28# new seamless casing cementing with 50 sacks mud and 50 sacks cement. After testing for water shutoff plan to drill to the Lovington at approx. 3550'. If the Lovington makes oil in commercial quantities we will set a string of 5 1/2" O.D. 14# new seamless casing cementing with 100 sacks cement and 100 sacks mud with in a few feet of the pay and complete. If we encounter water in the Loco Hills sand at approx. 2900' we will run a string of 7" O.D. casing and mud same. After the 5 1/2" casing is run we will pull the 7" casing. This well will be drilled from top to bottom with cable tools.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
