DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On November 19, 1942, plan to run approximately 2700' of used 5 1/2" 17# smls. casing instead of the same amount of new 7" 20# smls. casing as shown in our original Notice of Intention to drill of July 30, 1942.

This confirms our telephone conversation of Nov. 19, 1942.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
