Re: Oil and Gas Lease  
LC 028978(b)

Gentlemen:

Reference is made to the subject lease and to well No. 1 and 2, section 33, T. 18 S., R. 30 E., which are located within the designated Potash Area of Eddy County, New Mexico.

The drilling and completion of the wells were subject to compliance with "New Mexico Oil Conservation's Order R-111, and The Oil and Gas Operating Regulations of the Department". Recent hearings before the New Mexico Oil Conservation did not change nor amend the Order, nor has the "Potash Area" been altered since approving your notices to drill.

You are allowed 30 days from date of this letter in which to cement the oil strings back through the salt to the surface.

Very truly yours,

John A. Frost  
District Engineer
