DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Well will be drilled to an approximate depth of 3100. 3 5/8 casing will be set at about 500 feet, and cemented with fifty sacks of cement. The production string will be set through the Queen sand and cemented with 100 sacks of cement. Well will be drilled by Roush and Sheppard contractors.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
